

Name: _____

Class: _____

Marimba Playing

The marimba is a percussion instrument typically made of wooden keys and other natural elements that is struck with rubber mallets to produce music. It is an important instrument in both the Maya and Mestizo cultures of Belize, and is featured at many cultural festivities and traditional celebrations. Its use in ceremonies and social events is similar to that of the African ndimba.

Instructions: Colour the marimba players and their instrument.
